

ATTESTATION

CAF 1

REACH Information on SVHC substances

The REACH Regulation provides that Substances of Very High Concern (SVHC) are subject to a specific authorisation. The Article 33 of REACH requires manufacturers and importers to notify European users about the presence of substances of concern when their concentration is or exceeds 0.1% (w / w).

We certify that our product CAF 1 does not contain SVHC substances of the "Candidate List" for Authorisation, in force in Europe, since its last update published by ECHA on 2016 June the 20th (http://echa.europa.eu/chem_data/candidate_list_table_en.asp), at a content greater or equal to 0.1% (w / w).
